Revesby, NSW | 0468 362 846 | ahmedhkhawaja@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

University of New South Wales Sydney, NSW

Bachelor of Engineering (Honours), Software Engineering Expected 2028

Academic standing: Distinction WAM

Selected results: Database Systems (88), Programming Fundamentals (87), Requirements and Design Workshop (85), Data Structures and Algorithms (84), Computer Networks and Applications (80)

PROFESSIONAL EXPERIENCE

Effi Technologies Pty Ltd Sydney, NSW

AI Software Engineer Intern May 2026 - Jul 2026

- Built a Python and Playwright pipeline to collect cashback offers from 50+ banking partners and load them into the company platform daily, saving approximately 15 hours of manual work per week
- Deployed the pipeline using Docker and AWS (ECS, EC2 and Lambda), reducing end-to-end processing time from several hours to under 20 minutes
- Integrated LLM-based extraction to structure and normalise offer data across different bank formats; developed scraping and parsing logic to handle inconsistent source data

Nextbridge Ltd.

Software Engineer Intern Dec 2025 - Feb 2026

- Built and deployed MERN-stack web applications, delivering production features across 3+ client workflows
- Developed REST APIs with Node.js and Express and implemented payment processing through Stripe webhooks
- Implemented WebSocket communication between clients and servers to provide live updates

Sydney Design & Development Sydney, NSW

Founder and Full Stack Developer 2024 - Present

- Founded a web development studio delivering full-stack applications for Sydney businesses; launched a live marketplace at sydneydesigndevelopment.com.au
- Designed and managed a database supporting 1,500+ products, with payment integration and an admin dashboard

AWARDS

Atlassian x Mistral AI Hackathon Third Place

- Placed third in the AI hackathon organised by UNSW AISoc; judges described the project as one of the most unique entries

SELECTED PROJECTS

UniBlud UNSW Campus App

- Launched a campus app for UNSW students on the Apple App Store and Google Play, with an active student user base

Teapots Invoicing 2026

AI Document Automation | SENG2021 React, Node.js, AWS

- Built a web application to create invoices, despatch advices and order documents, including AI-assisted generation and validation of document data
- Deployed the application on AWS and released it at teapotinvoicing.app; worked in a four-person Agile team, adapting to changing requirements and user feedback
- Received UNSW Faculty of Engineering Top Teams Recognition in Term 1 2026 for technical work, adaptability and user-centred design

ServiceUNSW Digital Identity 2026

UNSW VIP ChallENG Program NFC, Backend, Security

- Designing an NFC-enabled digital identity system for campus access and authentication through UNSW's Vertically Integrated Projects program
- Developing backend identity and access-control infrastructure with data-security controls and real-time verification workflows

Farm Fresh 2025

Inventory Management System React, Node.js, MongoDB

- Built a full-stack inventory platform for a US produce farm to track and manage 100+ produce records in real time
- Developed React components and REST APIs with Node.js, Express and MongoDB; added role-based access control and deployed the application on Vercel and Render

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++

Frameworks and libraries: React, Next.js, Node.js, Express, Playwright, Pandas, NumPy

Databases: PostgreSQL, MySQL, MongoDB, vector databases

AI and automation: LLM integration, retrieval-augmented generation (RAG), AI agents, prompt engineering, web scraping, data extraction and normalisation

Cloud and development: AWS (ECS, EC2, Lambda), Docker, Git, CI/CD, REST APIs, WebSockets, Agile

LEADERSHIP AND CONTRIBUTIONS

Marketing Executive | Arc @ UNSW Student Club

- Led a team of 10+ designers producing brand assets for club events and campaigns

General Secretary | Aitchison College Computer Society

- Organised hackathons and a national STEM Olympiad with 1,000+ delegates

Course Contributor | Z-Notes

- Authored IGCSE Computer Science revision content
